# 2.1 My files

#### My files

Provides an overview of all the files on your reMarkable, and allows you to organize your notebooks, PDFs, and ebooks according to your needs. Here you can also add, move, rename, and delete folders. To show **My files**, just tap **Menu**, then **My files**.

#### **Create new**

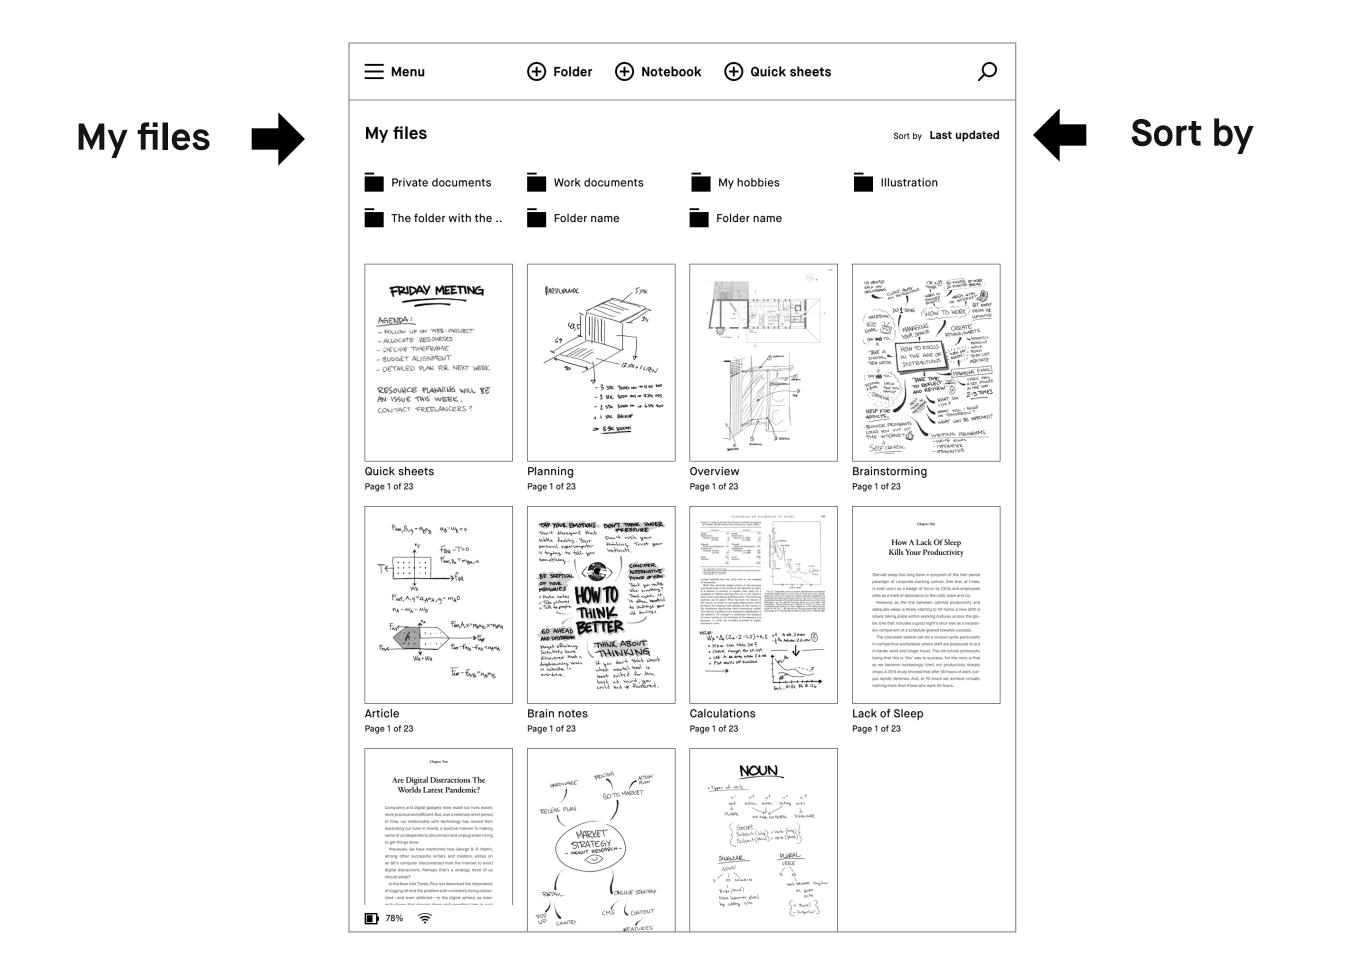

At the top of your screen, you can create new folders, notebooks, and quick sheets.

#### File order

Tap **Sort by** to arrange your files by last updated, by size, or alphabetically.

#### **Create new**

Folders, notebooks, or quick sheets

#### Menu

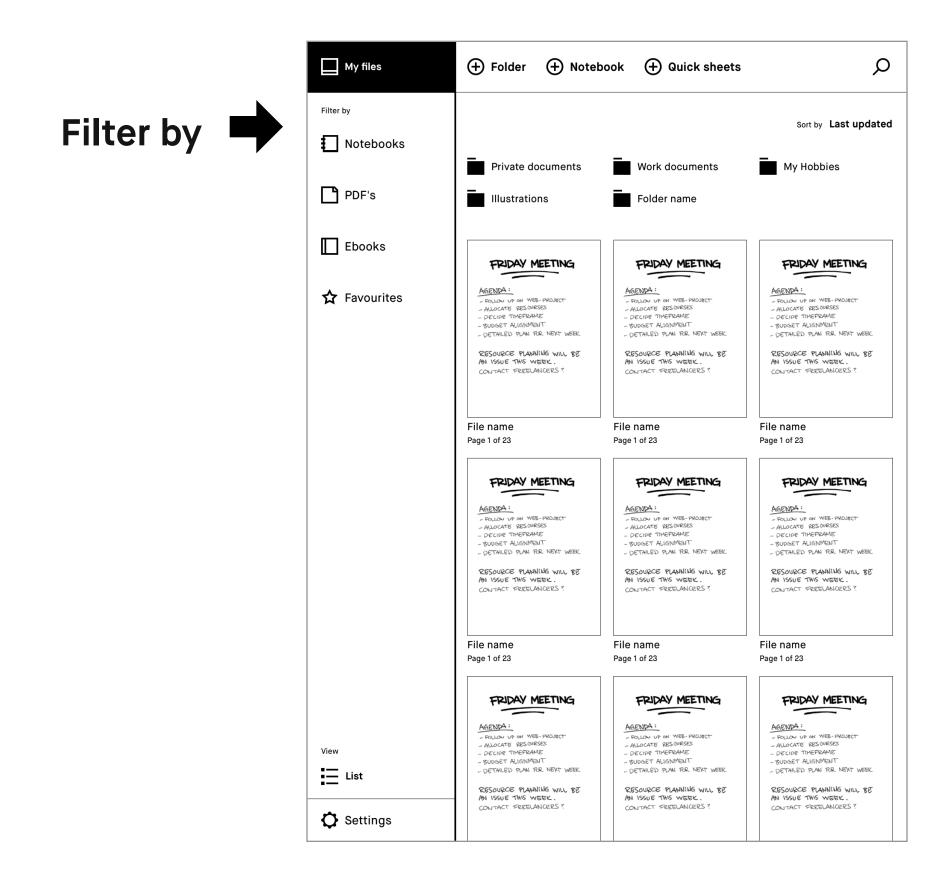

Tapping **Menu** in the top left corner reveals the sidebar menu and gives you the option to filter by **Notebooks**, **PDFs**, **Ebooks**, and **Favorites**. The sidebar menu is also home for your reMarkable's settings, and view options.

# Page management

- 3.1 Page orientation
- 3.2 Page management
- 3.3 Adding pages
- 3.4 Moving and reordering pages
- 3.5 Duplicating pages
- 3.6 Deleting pages

## 3.1 Page orientation

The orientation of the toolbar can be changed by tapping the notebook  $(\Box)$ , PDF  $(\Box)$ , or ebook  $(\Box)$  options icon, and making the desired choice. For landscape, tap **Set to landscape view**, or for portrait tap **Set to portrait view**.

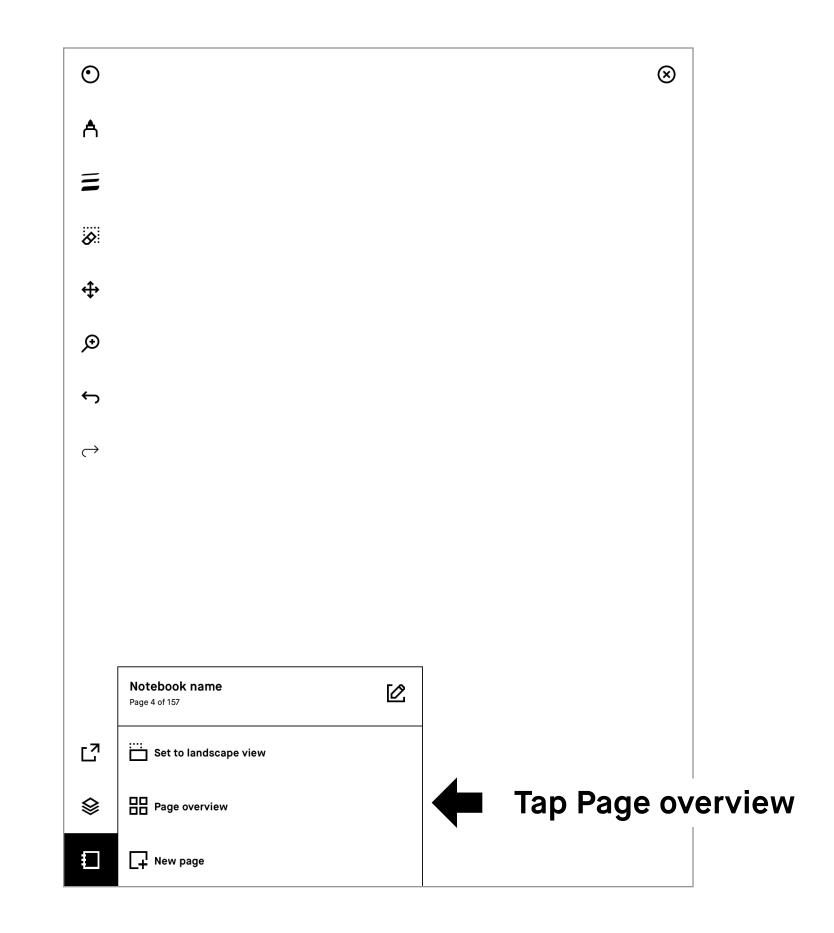

**Note** Notebook orientation is also defined by the selected template. For more information, see 4.4 Templates.

# **3.2 Page management**

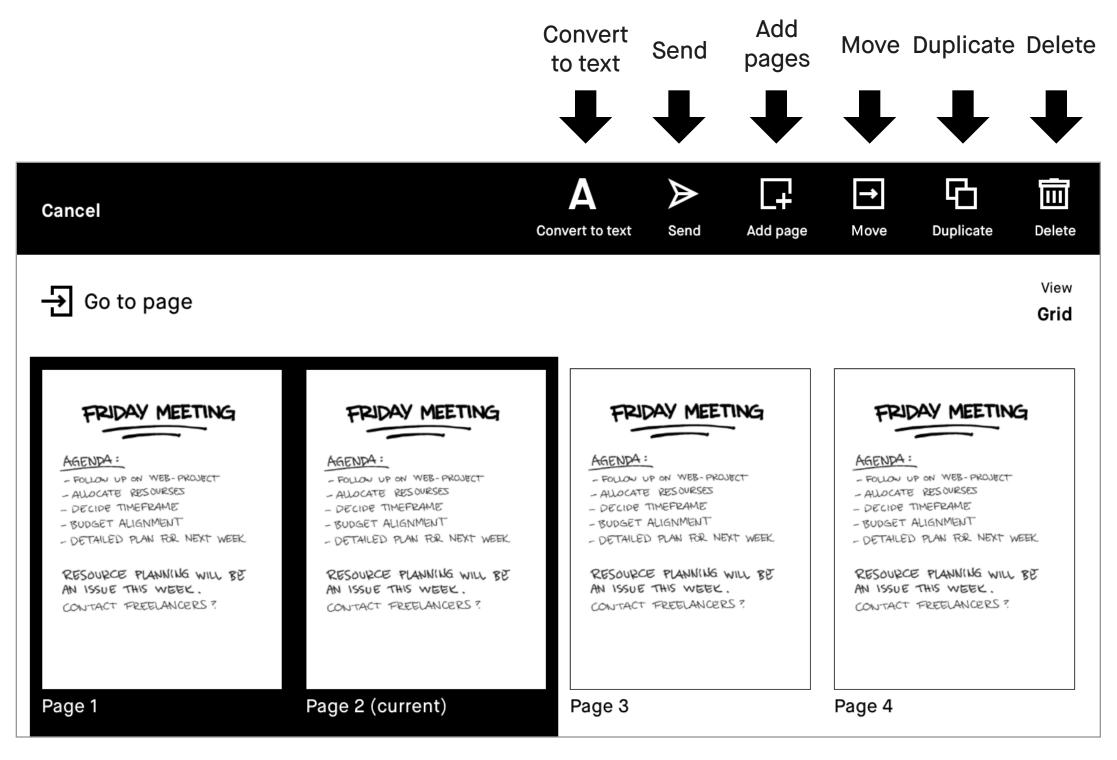

#### Page overview

Page overview is a page mangement function. To use it, choose the icon with the four squares  $(\square)$  located under the **Notebook** icon  $(\square)$ 

Once you're in the page overview, **long-press** to select the page you want to manage. To add additional pages just tap them. You will find the following page management options in the action bar at the top of your screen:

Add page  $(\Box)$ , Move  $(\Box)$ , and Duplicate  $(\Box)$ .

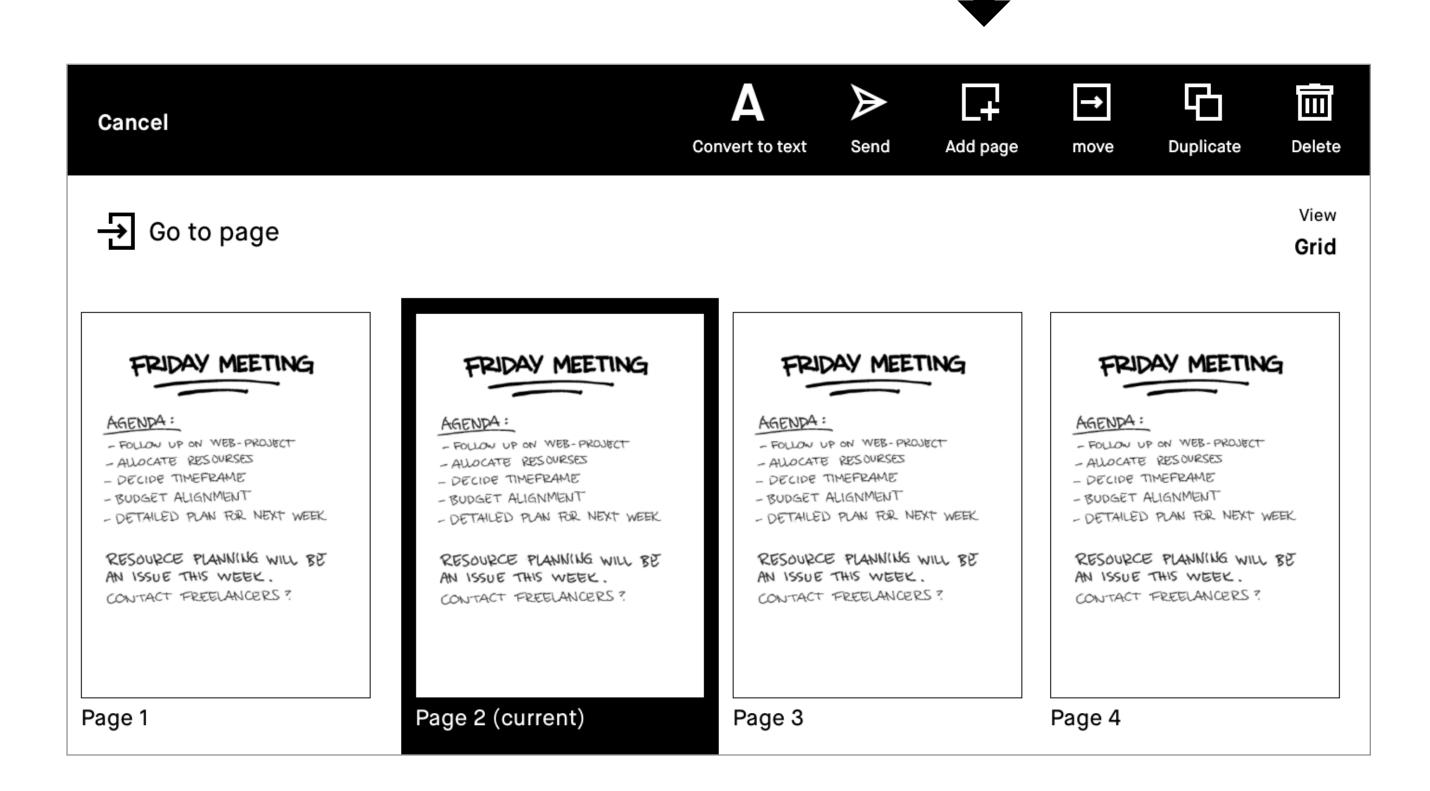

# 3.3 Adding pages

The simplest way to add a new page to a notebook is to **swipe to the left** when you're on the last page.

If you would like to add a page elsewhere in a notebook, you can do so by tapping the notebook icon at the bottom left and choosing **New page** ( $\square$ ). This adds a new page after the active page.

In **Page overview** you can insert a page into a notebook, just **long-press** to select a page, and then tap the **Add page** icon ( $\square$ ). A new page will appear after the chosen page. Add pages

# **3.4 Moving and reordering pages**

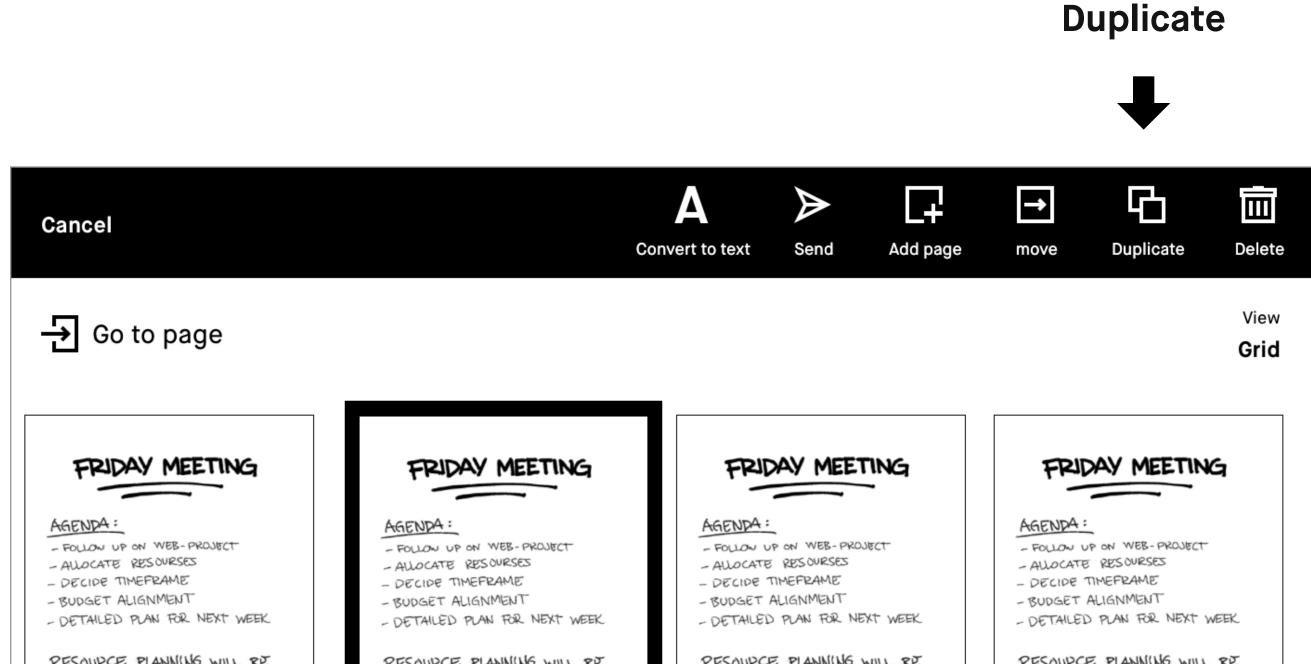

Tapping the Move icon  $(\boxdot)$  will allow you to either move pages within a notebook, or from one notebook to another.

To move a page within a notebook, simply choose where you would like to place the page, then tap either Place before or Place after at the top of your screen.

To move a page from one notebook to another, select the Move out icon ( $\square$ ) and then choose to move it to a new, or existing notebook. You can then choose where you would like to place the page. If you don't choose an exact location, the page will be placed at the end of the new notebook.

# **3.5 Duplicating pages**

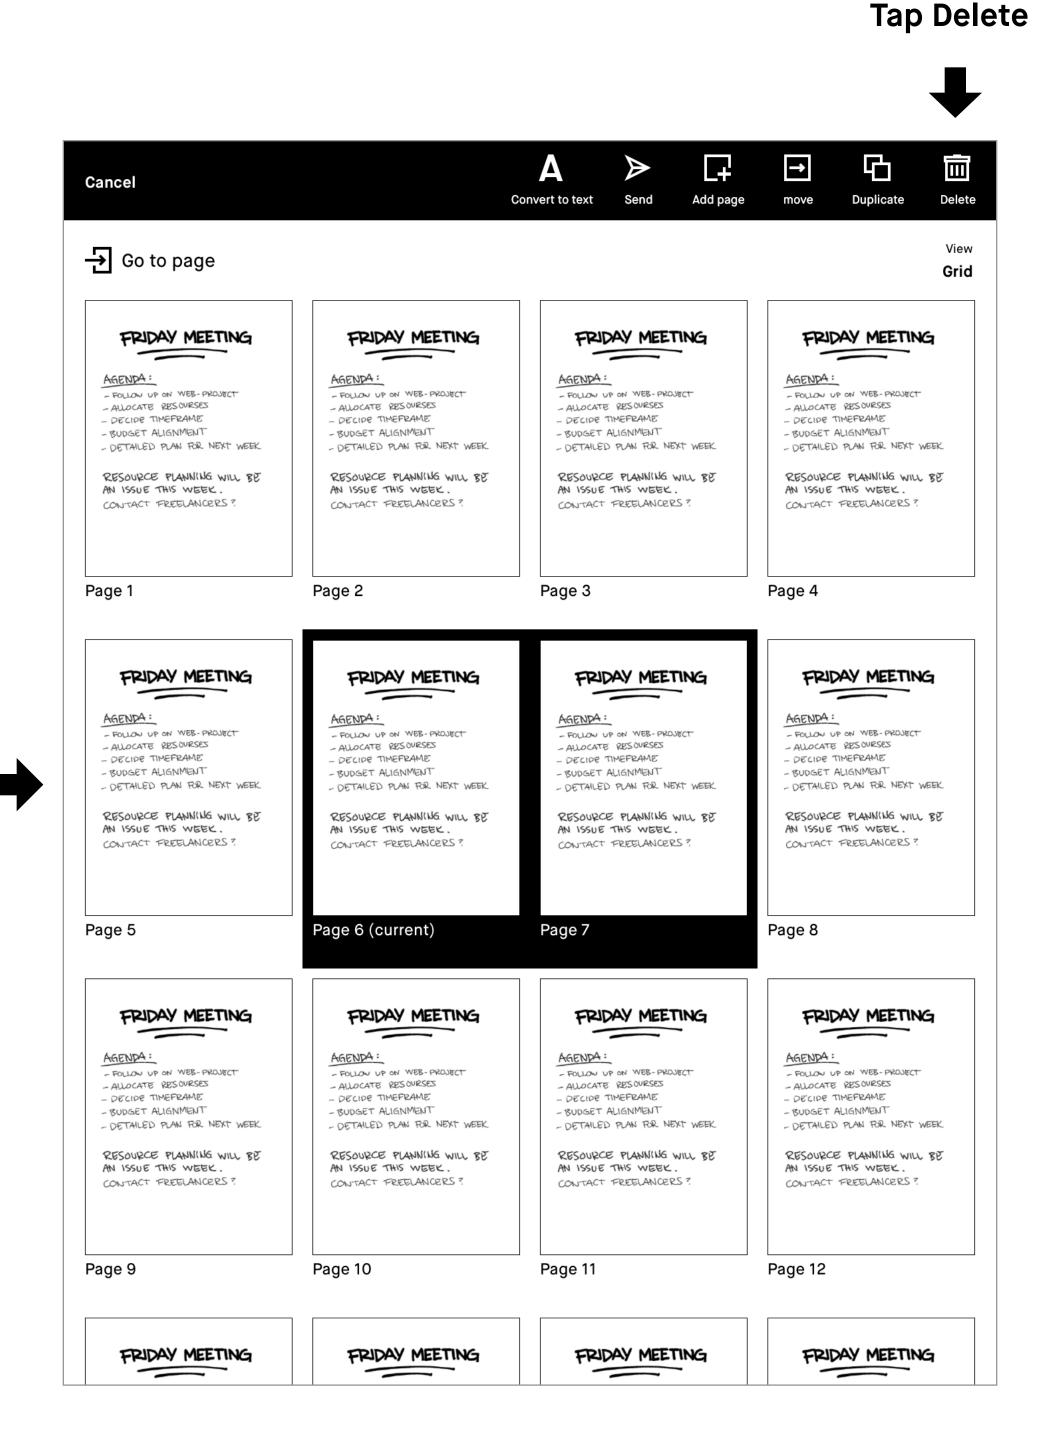

Tap the **Duplicate** icon ( $\bigcirc$ ), to make a copy of the current highlighted page. An exact copy will appear after the page highlighted in the notebook. To add a copy after a different page, **long-press** to select that page, before tapping **Duplicate**.

#### 4.1 Pens and brushes

#### Pen

# Å

#### Ballpoint

Your typical pen style; like a ballpoint pen, it has some pressure sensitivity, but doesn't react to tilt.

# Å

#### Fineliner

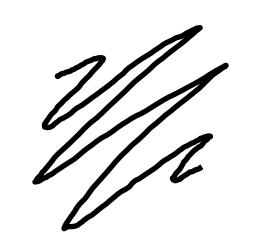

A rounded, even style with a stroke that has no texture, regardless of tilt and speed.

# A

#### Marker

A textured style with a stroke that is affected by the speed and pressure of the stylus.

#### Pencil

# 

#### Pencil

Has texture strokes similar to a real pencil, responds to the pressure and tilt applied.

#### **Mechanical pencil**

Has a consistent texture and line width.

# Brush

A

#### The paintbrush

A textured tool, sensitive to the speed, pressure, and tilt you apply.

# 4.2 Eraser

Eraser is a regular eraser, available in three different sizes.

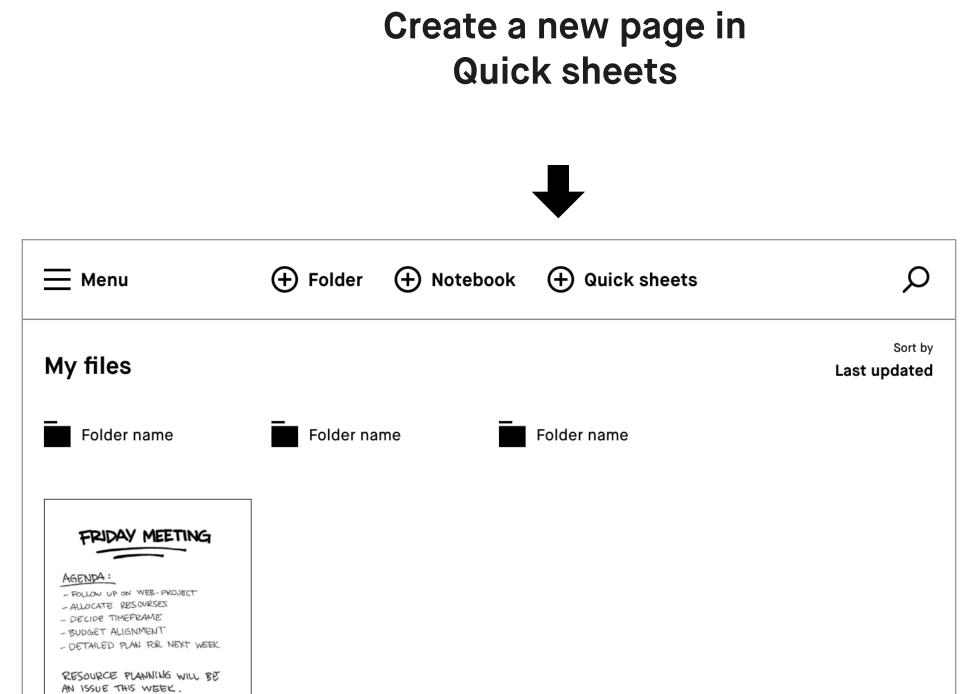

**Erase selection** allows you to draw around an area you want to delete, making it easier to erase larger specific areas.

Erase all erases the whole page or the current layer.

#### **4.3 Quick sheets**

The reMarkable paper tablet comes with a default notebook (quick sheets) for taking quick notes on the go, without having to create a new notebook and enter in information.

Quick sheets is always available under **My Files**,

and cannot be moved or deleted.

The **toolbar** is showing and presents all available tools.

The **toolbar** can also be hidden, for more focus on your content.

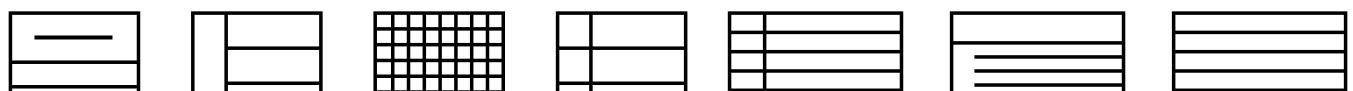

# **4.5 Templates**

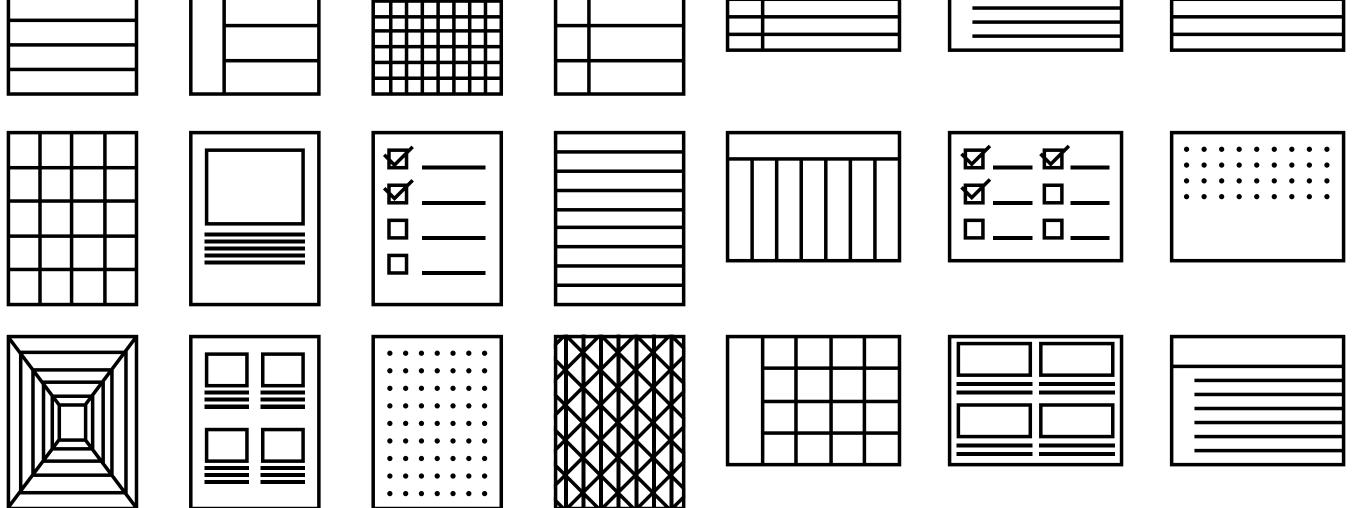

Templates are preset formats to be used as an aid when writing or drawing in your notebooks. All templates are available in portrait and landscape view. The chosen template will decide the orientation of your notebook.

#### Select a template

- 1. Create or open a notebook.
- Tap the layers icon (\$), found on the bottom left corner in the notebook.
- **3.** Use your finger or the Marker to browse through the templates. Tap on a template to select a template for your notebook.
- 4. Tap Save to set the template to your page.

#### **Examples of different templates**

You can set different templates to different pages in a notebook, just tap the layers icon, then tap the template layer and choose a new template.

The template on the last page of a notebook will be the default for all new pages within that notebook. To remove a template, simply tap the layers icon, then tap the template layer and choose the blank template.

The template overview shows your last used templates for quicker implementation, or you can tap **View all templates** to see all the templates in a categorized overview.

# 4.6 Handwriting conversion

There are four important things you need to know about handwriting conversion:

- reMarkable only converts handwritten notes in notebooks at the moment, not in PDFs or ebooks.
- 2. You need to be connected to a Wi-Fi network and logged in to a reMarkable account.

Note If you don't aleady have one, you can create a reMarkable account at my.remarkable.com.

- **3.** You can edit and share your converted notes via email (see below) but they will not be stored on the device.
- 4. Writing at an angle or non-horizontally doesn't work; neither do symbols (such as mathematical symbols or diagrams), but several forms of bullet points are recognized...and some smiley faces too.

#### **Convert in your language**

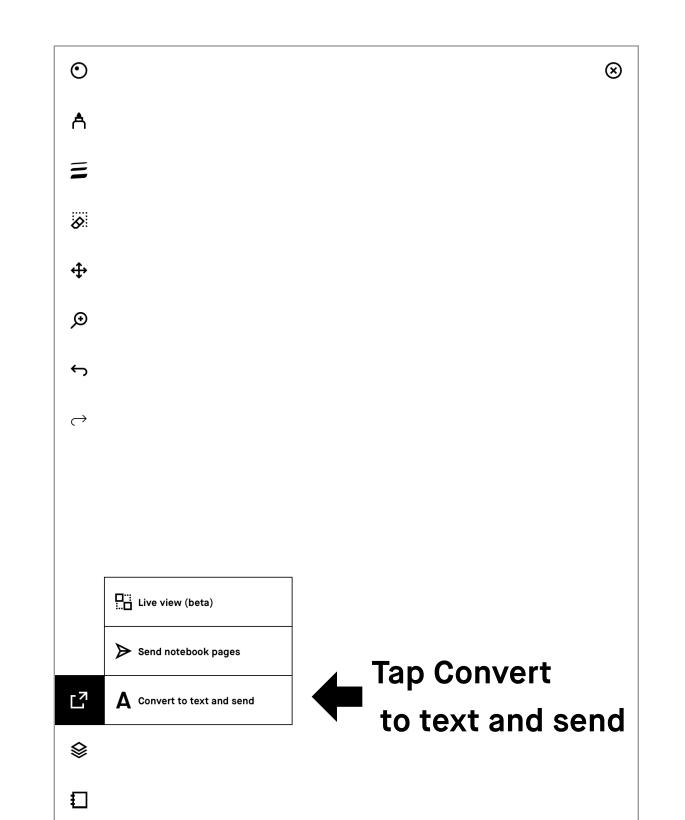

For the best results, go to settings, Handwriting Conversion, and specify which lanuage your notes are written in. We currently support 33 languages.

- 1. Go to the Settings page.
- 2. Select Handwriting Conversion.
- **3.** Tap on the lanuage currently selected.
- 4. Select your new language.

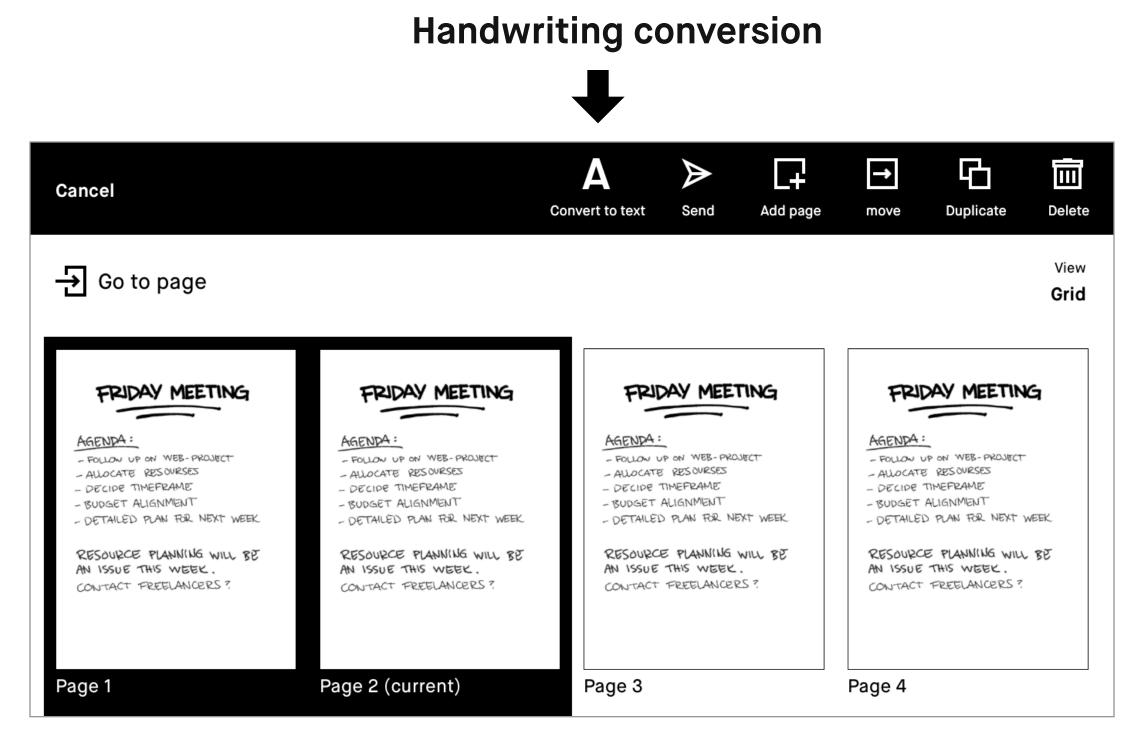

How to convert your notes into typed text

- 1. Tap the share icon (2) in the bottom left hand corner.
- 2. Tap Convert to text and send (A).

**Convert multiple pages at once** 

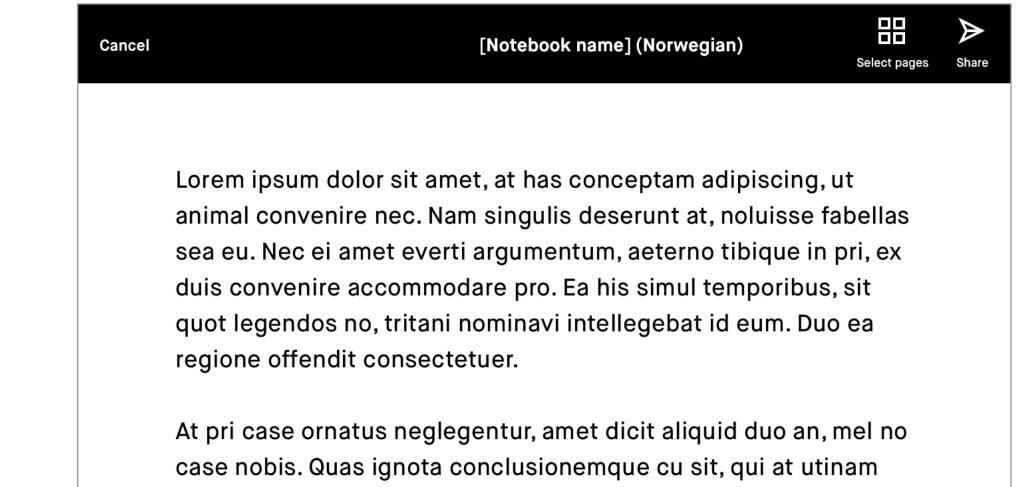

- 1. Go to Page overview (⊞) and long-press on the notes you want to convert.
- 2. Tap the handwriting conversion icon (A).

#### How to edit your notes before sharing them

Once your handwritten notes have been converted into text you can edit and share them with others. If you edit this text, your handwritten notes will not be affected.

To edit the text, simply tap the word or letter you want to edit and use the keyboard to make changes.

#### How to share your converted notes

In the action bar at the top of the screen, you will see the **Send** button. This will take you to the email sharing feature where you can input the recipient(s).

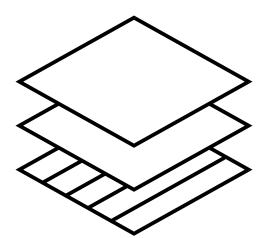

The converted document will be sent as the body text in the email.

# 4.7 Layers

Layers allow you draw on transparent sheets that are stacked on top of each other. The sheets, or layers, may be rearranged, hidden, or deleted. You can rename (**long-press** on name), edit, and reorder your layers.

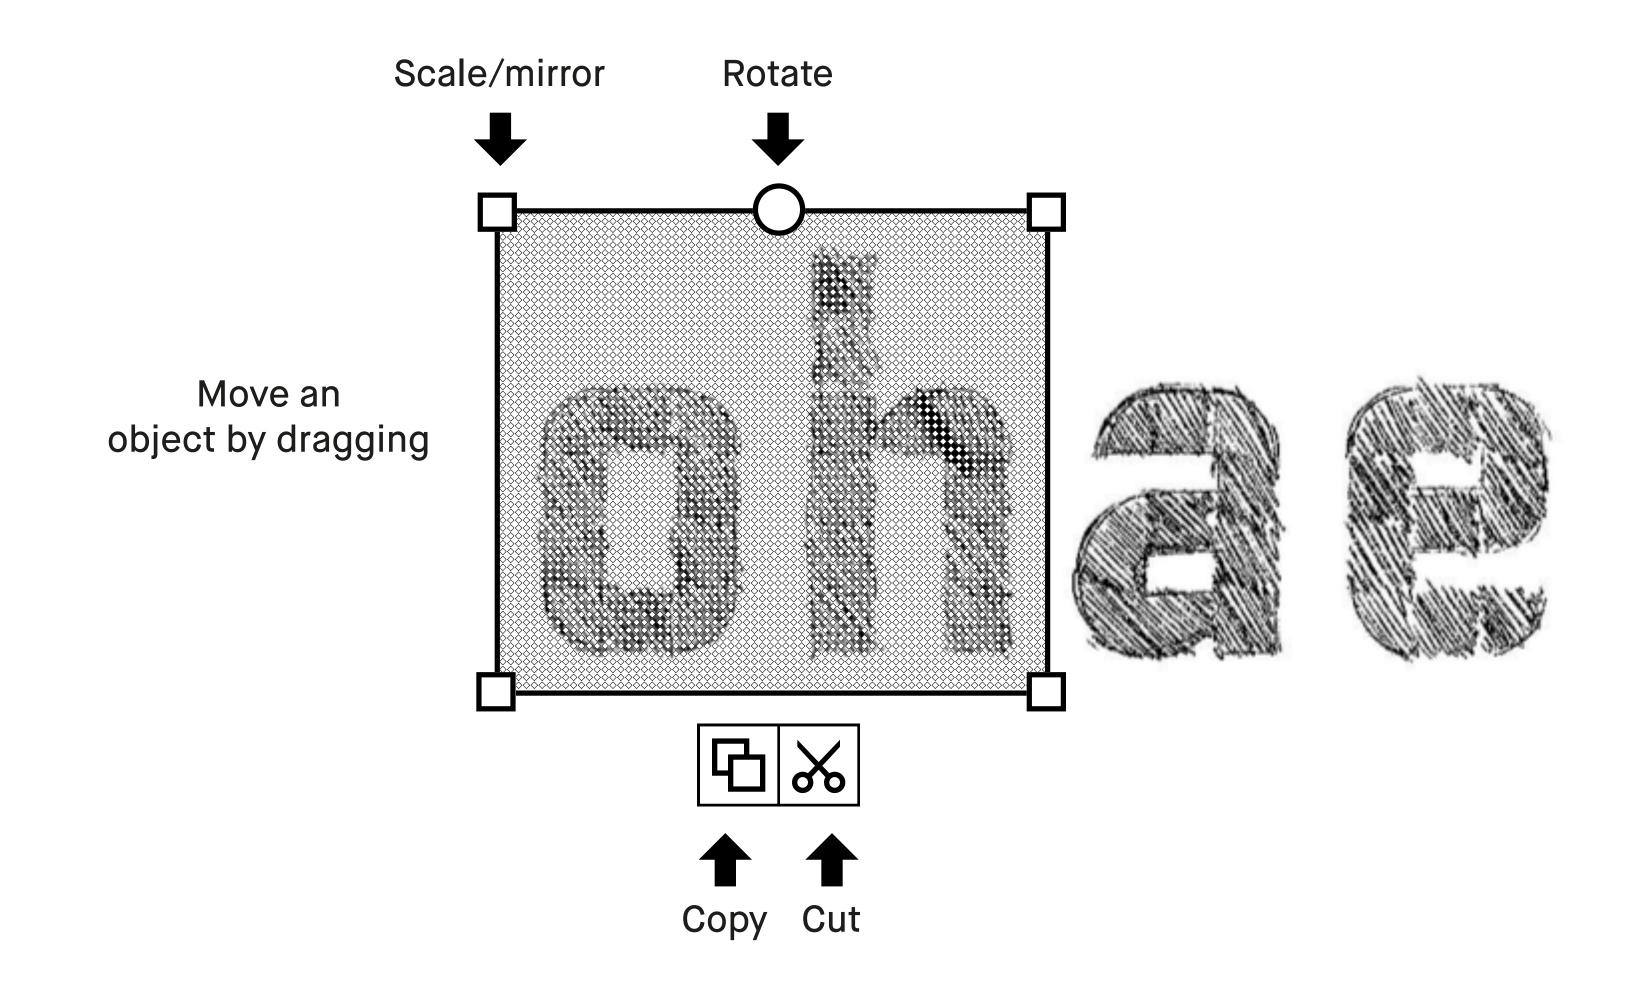

# 4.8 Selection tool (copy, paste, and other functions)

#### How to use the Selection tool

The **selection tool** (III) allows you to move, scale, rotate, cut, copy, and paste your text or drawings. To select an object, draw a line around it with the **selection tool**.

- Move an object by dragging it with the Marker to the desired position. Make sure you start with the Marker inside the boundary box.
- Scale an object by dragging one of the corners to adjust the size. Mirror a selection by dragging one of the corners past its opposite side.
- Rotate an object by dragging the circle on top of the boundary box in the direction you would like it to rotate.
- Copy or cut a selection by tapping the copy (凸), or cut (炎) icons beneath the boundary box. Once an object has been cut or copied, you can paste it by tapping

the Marker where you would like the object to appear, which you can do on any page or layer, in any notebook.

Note: a notification at the bottom of the screen always appears if there is something on the clipboard.
