

SKILLER SGK50 S3 WOOD BAREBONE

A compact layout with full functionality and a look that impresses: The Barebone version of the SKILLER SGK50 S3 Wood keyboard has the same technical advantages as the rest of the S3 series, including hot-swap switches and keycaps, as well as full customization possibilities using VIA and QMK. And in addition to the stylish real wood of the Wood series, the Barebone version is aimed at full creativity and comes completely without any pre-installed switches and keycaps.

Features

- IMPRESSIVE LOOKS**
 Apart from modern design elements, such as the RGB Illumination and the chic USB-C coiled cable, the SKILLER SGK50 S3 Wood Barebone catches the eye with its wooden housing and provides a strikingly unique look that combines the classic and the modern.
- FOR THE CREATIVE AND THE DETERMINED**
 The SKILLER SGK50 S3 Wood Barebone will be the perfect choice for those who already have a good idea about the keycaps and switches they really want to have. This is because the keyboard is supplied without any pre-installed switches and keycaps, allowing for the complete personalization of the layout.
- CUSTOMIZABLE TYPING EXPERIENCE**
 Do you prefer the personal touch? That's no problem! Switches of your choice – with either 3 or 5 pins – can easily be installed and used on the SKILLER SGK50 S3 Wood Barebone. Of course, the tools required for hot swapping are already included with the keyboard.
- RICH KEYBOARD SOUND**
 To ensure that the keyboard sounds as good as it looks, we have installed a polycarbonate positioning plate and a silicone damping for a rich, deep sound.
- COMPACT FORM FACTOR**
 The SKILLER SGK50 S3 Wood Barebone with its 75 percent form factor and 85 keys is aimed specifically at gamers who prefer more space on their desk, but who don't want to compromise on functionality.
- FULL CUSTOMIZATION THANKS TO OPEN SOURCE**
 Instead of having to install software, the SKILLER SGK50 S3 Wood Barebone allows the RGB illumination and macros to be simply programmed on-the-fly. In addition, a complete range of customization is available through the compatibility with the open-source software VIA and QMK.

Specifications
