Highlights

Coffee boost technology

Get the most out of your pad thanks to the innovative SENSEO® coffee boost technology that delivers a fuller, richer flavor through: A new finer distribution of water (from 5 to 45 aroma nozzles) which ensures the hot water is optimally spread across your entire SENSEO® coffee pad, touching all 50 coffee beans at once. Therefore each grain of ground coffee will release all the aromas and flavors, delivering a richer, fuller taste.

Innovative finishing

This premium coffee machine is the most stylish and high end model of the whole SENSEO® range and has been designed to perfectly fit into your kitchen space.

Intensity switch

This new SENSEO® appliance offers you more choice as it has an extra coffee recipe setting. Next to the long, smooth SENSEO® coffee you can choose as well to make a strong, smaller SENSEO® coffee by simply switching the knob. Boost your coffee for moments where only an extra strong, short SENSEO® coffee will do.

Adjustable spout

By raising or lowering the spout you can adjust your SENSEO® coffee machine to the size of your favorite cup or mug.

Delicious coffee crema layer

The fine SENSEO® coffee selection and the unique SENSEO® brewing system make sure

that your perfect cup of coffee always comes with a rich and delicious coffee foam layer - proof of premium taste and quality.

Variety of blends and flavors

SENSEO® offers you a large variety of coffee blends and flavors, each with its own distinctive taste to fit your personal preference.

1 or 2 cups at the same time

This SENSEO® coffeemaker prepares one or two cups of your delicious SENSEO® coffee in less than a minute.

Automatic shut-off

Your SENSEO® coffee machine automatically switches off after 30 minutes, allowing you to save energy.
