

PANZER EVO RGB

The RGB Crystalline Titan

PANZER EVO RGB is the perfect combination of four massive tempered glass covers and four powerful RGB fans in an exceptional case. With the included fan controller, you will be able to control all the power of each fan's 18 LEDs and enjoy more than 100 different dynamic RGB lighting effects in one of the most beautiful cases ever created.

Chromatic Overflow

Four VORTEX RGB fans + COUGAR Core Box

The powerful VORTEX RGB fans are not only powerful cooling components; they're also capable of creating visual wonders. While most competitors' static RGB fans (which only display a single color) only allow simple color changes, COUGAR's fans feature dynamic RGB effects that are lively visual spectacles. With more than 100 different effects that can be controlled remotely with the included COUGAR Control Box and the possibility of connecting directly to compatible motherboards through 5V RGB connector, the VORTEX RGB is the best cooling you could get.

Convenient Upgrades

The 4 included VORTEX RGB 120 fans can by themselves create a truly magical atmosphere, but some users want even more. Fear not! The COUGAR Core Box supports up to 8 RGB fans, and 4 RGB LED strips, enough to make your PC overflow with light.

Front Panel Control Center

To provide easy access and connectivity for all your devices, PANZER EVO RGB's front panel sports a plethora of connectors. A 3.1 USB Type C connector for the newest devices, two USB 3.0 for high-speed connections and one USB 2.0 for compatibility other usage fulfill all your data transfer needs; the conveniently placed audio in/out allows you to make good use of your headsets, and the integrated fan controller gives you the ability to adjust on the fly the case fans' behavior.
