

eCONTACT Plus

THE ULTIMATE IN CONFIDENCE AND COMFORT

Specifically developed for the commuting and load-carrying demands of e-bikes. This high-mileage tire features a compact tread pattern to keep rolling resistance low, boosting the range of each battery charge. Thanks to the unique tread and advancement of the Continental construction technologies, the eContact Plus boasts particularly high protection from nails, glass and larger hazards.

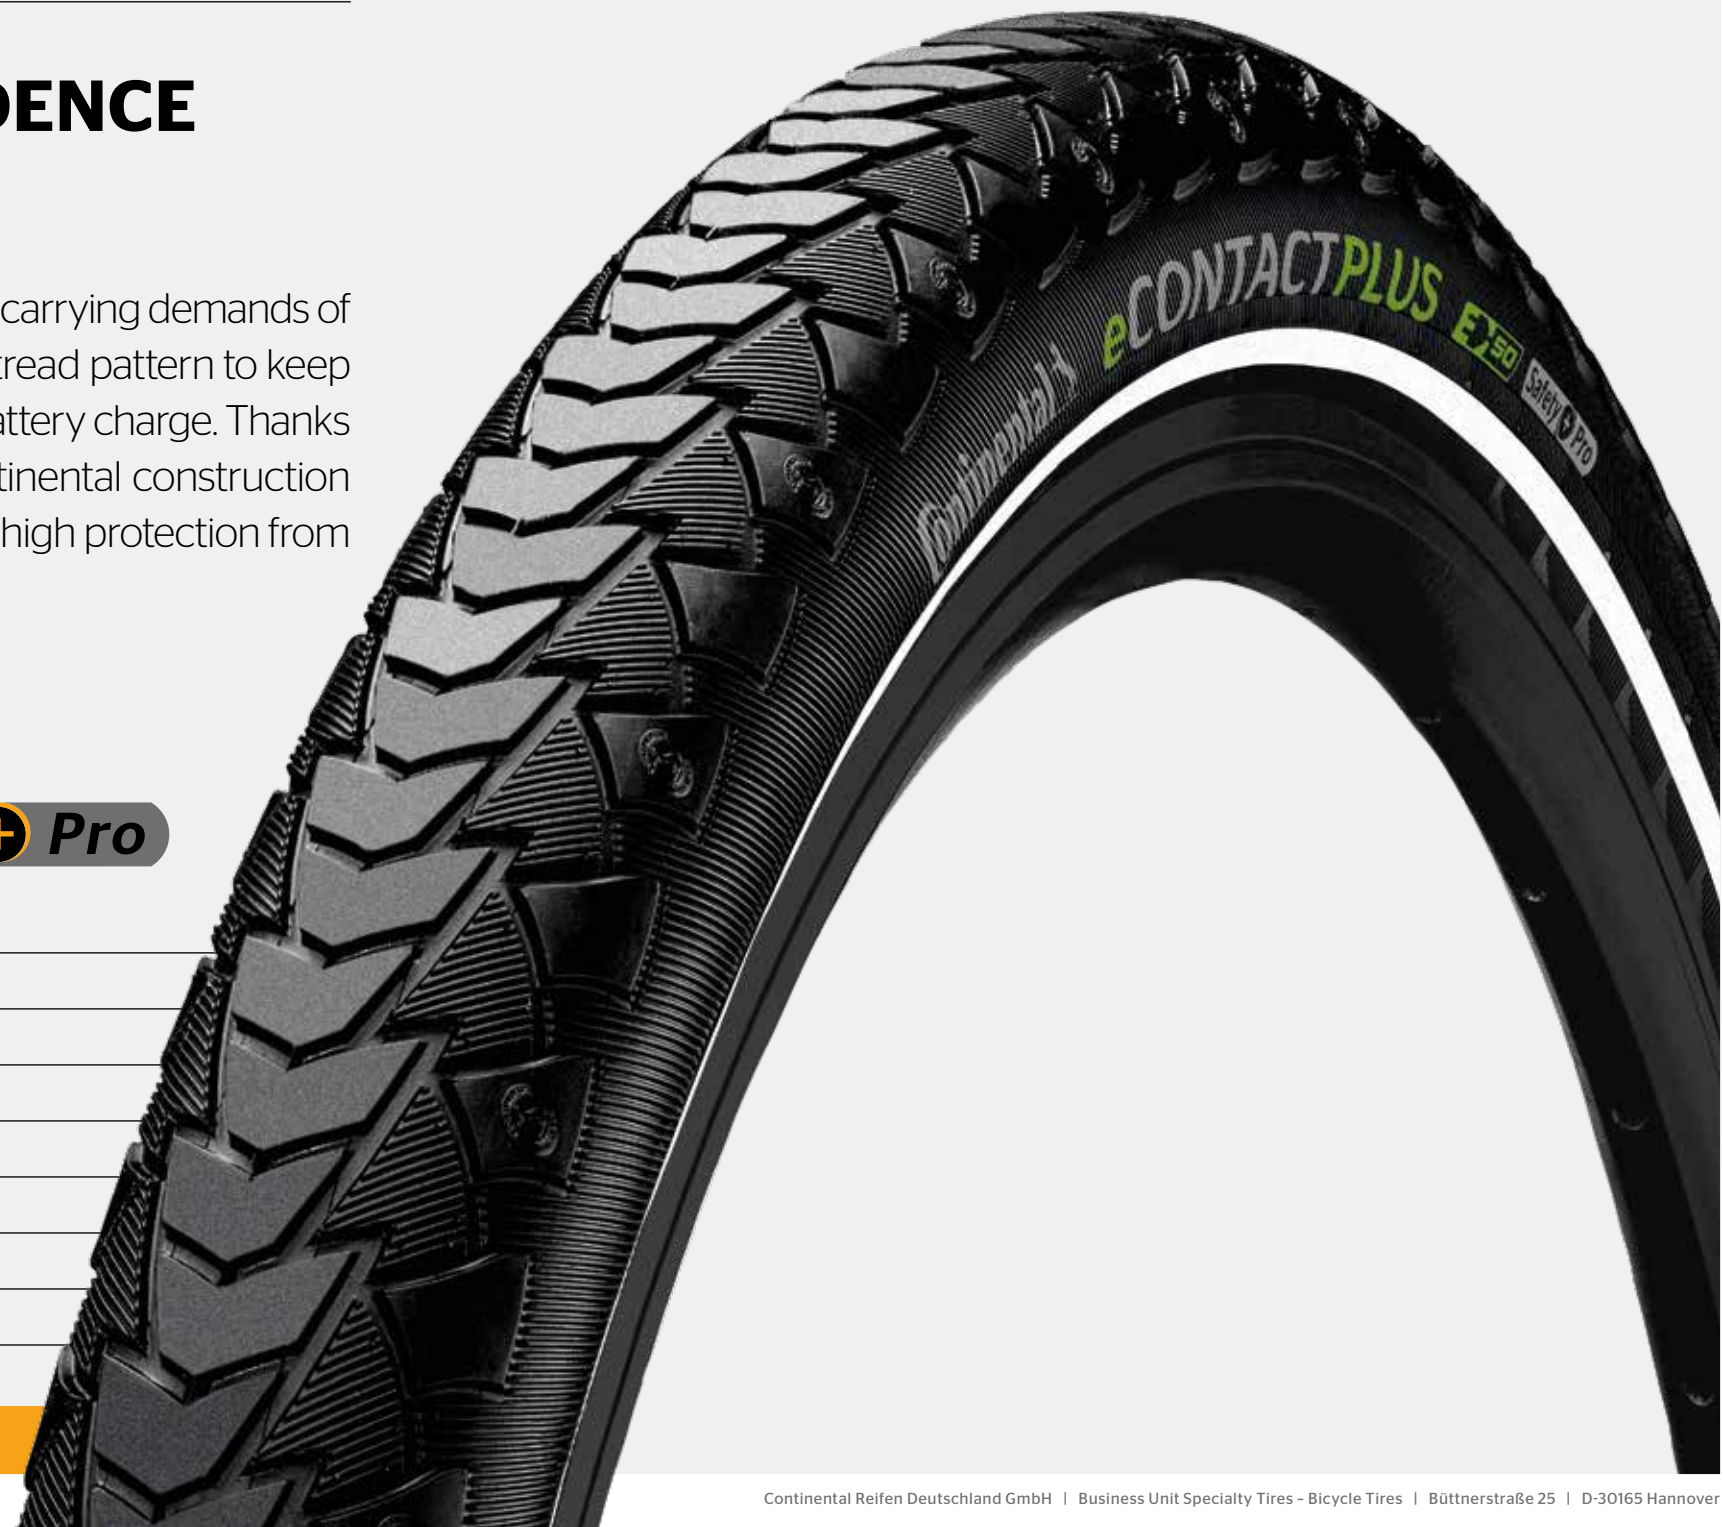

Specifically designed for the
use on electrified bikes

Safety + Pro

max. load kg	up to 128,0

Safety Pro

Engineered for the unique demands of modern e-bikes and cargo bikes up to 50km/h. Our Safety Plus Pro Breaker technology combines highly flexible rubber with the proven strength of our tightly woven PolyX puncture-resistant fibers. The high elasticity keeps rolling resistance low, prolonging the e-bike battery life so you get more miles from each charge. When riding with heavy loads, the Safety Plus Pro Breaker contributes to confident handling through busy traffic and sharp corners, no matter the conditions.

Suitable for E-Bikes: For our E-Bike tires we fall back on over 100 years' experience with moped and motorcycle tires. Those tires marked with this label are also certified for S-Pedelecs. With their high quality structure, puncture protection is high and the rolling resistance is low offering protection from premature wear brought about by the additional driving force.

Reflective Strip

For improved safety when riding in the dark, our Reflective Strip on the tire sidewall greatly enhances your 360-degree visibility around other road users. The Reflective Strip not only makes it easier for you to be seen but also boosts your confidence when riding on busy roads in low light conditions. Be seen. Be safe. Keep riding.
