

Audio Baby Monitor | 2.4 GHz

General information

Gain total peace of mind that your little one is sleeping soundly thanks to the crystal-clear audio contact provided by this Nedis® Digital Baby Monitor.

Using the latest FHSS technology, this monitor ensures that minimal interference occurs and you have a direct connection to your child's room. It operates over large distances, with a range of up to 300 metres, allowing you to be anywhere in the home or garden and still hear your child. You'll find the simple plug and play set up make this so easy to use, and there's even a handy warning sound to alert you if your monitor loses connection with the base unit.

Any sounds from your baby's room are also displayed by LED lights on the monitor, providing a visual indication of just how loud the noise is. This means that you can have the volume set to low and still be instantly aware of any sounds from your baby's room.

For complete mobility and flexibility your baby monitor can be powered by either plugging it into the mains or by using batteries (6 x AAA, not included) if there is not a plug nearby.

Features

- Easy to set-up
- Stable and secure audio connection - free from interference thanks to FHSS technology
- Works from batteries or mains - for complete flexibility
- Up to 300 m range - allowing you to be anywhere in the house
- Lights indicate any noise - if you have the volume set low
- Warning sounds - to alert you if your monitor has lost connection with the base unit
